	Drive System	PAi Smart Safety System	Basket / Storage	Supported

PAISEEC L5 is a compact, foldable, and lightweight electric vehicle designed for urban mobility. It features a 24V 10Ah Lithium Battery, a 250W Brushless Motor, and a PAi Smart Safety System. The vehicle is equipped with 8" pneumatic tires, a 42.9 x 35.1 cm seat, and a 1.9 kg battery weight. It is available in Gray and Blue colors and is supported by a 20 km (12.4 miles) range per charge. The vehicle is designed to be foldable and is suitable for use in environments ranging from -15 to 40°C. It is also airline approved and has a weight capacity of 120 kg (265 lbs).

PAi Safety System - The automatic deceleration function continuously monitors the terrain and activates when necessary to slow down the vehicle when turning or going downhill, thereby improving stability and preventing rollovers. The alarm will sound if the gradient reaches 8°, which is the regulated limit for most city roads. A voice prompt will remind the driver to get off the seat and push it to flat ground.
